# AGRI SHOP ONLINE APPLICATION

LOW LEVEL DESIGN

Overview of Agri Shop Online:

The main objective of this project is to design an Agri shop Online application that will allow the customer to purchase a products, farmers are used to add products and quantity and prices of the products.

Procedure Flow:

User Registration:

If a customer and farmer wants to create a new account first they have to register with 12 digits Aadhar number and personal details with a like name and phone number.
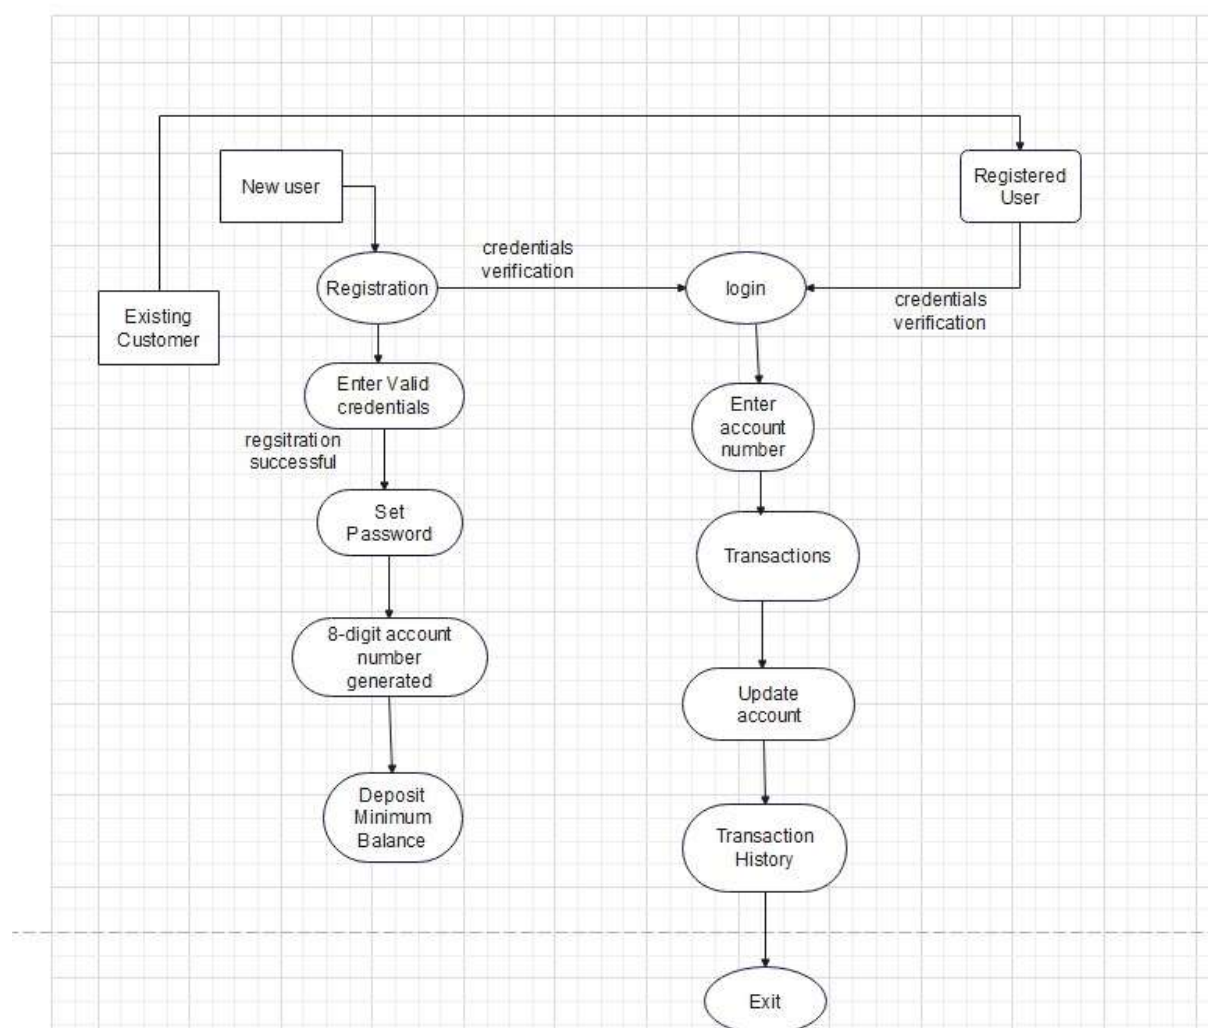

Password Validation:

The password should be a combination of Upper Case Letters, Lower Case Letters, Numbers and Special character.

Create Account for Customer & Farmer:

On successful registration the farmer can upload his product and prices and quantity regarding it. Customer can purchase any product from the online shop.

Procedure Flow:

Customer/ Farmer Login:

Customer has to login with name and password, if the password is correct he/she can processed further.

Admin:

Admin can add, edit, view and delete records/products of farmers and customers. Payment details will be send by the admin.
